## Description:

When his physicist mentor is brutally murdered for his possible knowledge about Einsteins Unified Theory, Columbia University professor David Swift and his Princeton scientist girlfriend are swept up by a violent race between the FBI and a ruthless mercenary for control of the information and its staggering potential. 150,000 first printing.

This book was great fun to read. You may wonder why there are some reviews that are so harsh and vehement negative. I think politics be the clue. The writer seems (well, to me) to be referring to George when he writes: The president was a boob, a brainless figurehead who had a talent for winning elections but little else. There are enough references to the VP and Secretary of Defense to create a sense of currency in his descriptions of the immoral executive branch of the government. The Secretary of Defense describes the protagonists as professors, probably ultraliberal Looney Tunes reflecting some of the attitudes of the current administration. I bet political disagreements with the author are the real sources of the vehemence of the negative reviews. The percentages seem about right. :)
